Drawing on numerous Japanese and non-Japanese primary and secondary sources, this highly informative book analyzes all aspects (both domestic and international) of foreign direct investment made by Japan's multinational corporations in Asia, the European Union, and the U.S. It covers the critical period from 1970 -- the point at which Japan's economy reached a level of global importance -- through 1998 -- the nadir of Japan's economic woes. The book offers numerous perspectives to explain the changing characteristics of Japan's FDI practices over the period. The text is well supported by some 50 figures and data tables compiled from both Japanese government ministries and multinational corporations.

Revised version of papers presented at the Workshop on Comparative Study on the Small and Medium Scale Industry in India and Japan, held at Tokyo during 8-9 March 1996.

This book, and its companion, *Technology, Competitiveness and the State*, examine and evaluate Malaysian industrialization in terms of its experience of and prospects for industrial technology development. The focus is on the development of Malaysia's technological-industrial base from a sector and firm-specific perspective, including the role of foreign multinationals in this process. *Industrial Technology Development in Malaysia*, provides a valuable analysis of the technological development of a Newly Industrializing Country and reflects on whether existing development strategies can be maintained in the wake of the financial crises sweeping the East Asian economies.

This volume consists of two parts. Part one discusses economic friction in the Asia-Pacific region from three aspects: macroeconomic and microeconomic friction, and that between the state and the market mechanism. In part two, four types of legal frameworks for dispute resolution are examined.

Popular Science gives our readers the information and tools to improve their technology and their world. The core belief that Popular Science and our readers share: The future is going to be better, and science and technology are the driving forces that will help make it better.

Facing Asia examines the political and economic processes of regionalism and regionalization in Asia with a focus on Japan and Japanese actors. The articles by eminent scholars address the forces that tie the region together. They treat topics ranging from Japanese bilateral and multilateral ODA and the activities of state and non-state actors on the regional level to issues such as Japanese

multinational corporations, foreign direct investment in Asia, and regional financial institutions. Methodologically, the authors draw on disciplinary strengths in either the social sciences or economics while organizing their treatment around a shared political-economic perspective. By looking at Asia through an interdisciplinary lens, the volume offers something to anyone interested in Japanese involvement in the politics and economics of the region. In the final chapter, the editors weave together the different approaches to Japan's place in Asian regional cooperation in the 1990s and beyond.
