Beginners Guide To Programming The
A computer is a machine that processes and stores information. Programming is telling the computer how to ingest, process, and then store that data. When someone writes a program, that person is giving the computer a set of commands that it must follow. When we write programs, we are writing instructions that the computer will follow.

A Complete Beginner's Guide to Programming - DEV
1. Through Interactive Websites. Websites like Codecademy and Freecodecamp are recommended for interactive coding sessions. These were built with the idea that many beginners are stuck at the beginning when they start to learn to code while setting up the development environment.
