Betrayed is the true story of two men on opposing sides in WWII, one a sergeant in the US Air Corps and the other a Nazi rocket engineer. The sergeant was shot down, betrayed, and imprisoned in Buchenwald, while the engineer, an SS-Major, became a national hero of the Third Reich. After the war, the records of both men were classified Top Secret and concealed by threats, denials, and misrepresentations. The US government refuted the sergeant's accurate account, while promoting a fabricated history for the engineer, Dr. Wernher von Braun, who became as famous in the US as he had been in Nazi Germany. Betrayed demonstrates how an unconstrained military intelligence operation disrupted the lives of American ex-POWs in the name of "National Security."

A new book from the Lean Manufacturing Expert Sebastian Brau, presenting techniques, software, procedures and tricks to get the maximum performance from your Lean project by the use of current available technologies in factories. You will learn how to: 1.- Implement the 'Active Inventory' methodology to prevent your factory from having any stockout ever again. 2.- Use 'lean markers' to detect productivity deviations in your operations more easily. 3.- Merge Kaizen and Pareto to complete your 'continuous improvement' cycles faster and cheaper. 4.- Transform the quality controls in your factory into plant sensors to build a 'digital nervous system'. 5.- Use simple plant records to automatically feed your ERP. 6.- Implement a Material Traceability control that does not jeopardize your operation's productivity with unnecessary costs. 7.- Use SMED video guides to reduce the need to train your staff and the global time for the Lean project to be implemented. 8.- Implement a time control for your staff without offending susceptibilities in the factory. 9.- Know how the new North American Law 'FSMA' can affect your operation if you do not anticipate its effects. A different Lean book written by a Robotics and Artificial Intelligence Software Engineer with more than 20 years' experience in implementing Lean Manufacturing and structured with the different technological viewpoint that his specialized profile allows, in the form of "Practical guide on the correct use of Technology in a Lean Project"

Brian Braun, a local Dallas photographer, believes he's hit Pulitzer pay-dirt when he receives an unusual call for an extraordinary photo shoot from a U.S. Senator. Afterward, however, Braun comes to realize his photographs have done more than record history. He's recorded one of the greatest hoaxes and politically devastating scandals that breeches beyond the boundaries of Watergate. The

hoax is perpetrated on the American people by a private security firm that specializes in high profile political murder. Relying on his own streetwise wits, Braun has less than forty-eight hours to stay a step ahead of a highly motivated death squad and keep from being branded by history as the next Lee Harvey Oswald.

The Red House Mystery is a classic "whodunit" set in an English country house. An eclectic cast of characters are gathered in the house when the owner's brother, recently arrived from Australia, is found murdered in a locked room. Two of the house guests take the investigation upon themselves and they wade almost playfully through the abundance of evidence and theories.

"The physics of vulnerability is simple: If we are brave enough often enough, we will fall. The author ... tells us what it takes to get back up, and how owning our stories of disappointment, failure, and heartbreak gives us the power to write a daring new ending"--
