Memory, mythology, and obsession collide in this “slyly charming” (New York Times Book Review) account of the giant squid. In 1874, Moses Harvey—eccentric Newfoundland reverend and amateur naturalist—was the first person to photograph the near-mythic giant squid, draping it over his shower curtain rod to display its magnitude. In *Preparing the Ghost*, what begins as Harvey’s story becomes spectacularly “slippery and many-armed” (NewYorker.com) as Matthew Gavin Frank winds his narrative tentacles around history, creative nonfiction, science, memoir, and meditations about the interrelated nature of them all. In his full-hearted, lyrical style, Frank weaves in playful forays about his trip to Harvey’s Newfoundland home, his own childhood and family history, and a catalog of peculiar facts that recall Melville’s story of obsession with another deep-sea dwelling leviathan. “Totally original and haunting” (Flavorwire), *Preparing the Ghost* is a delightfully unpredictable inquiry into the big, beautiful human impulse to obsess.

Mollusks have been important to humans since our earliest days. Initially, when humans were primarily interested in what they could eat or use, mollusks were important as food, ornaments, and materials for tools. Over the centuries, as human knowledge branched out and individuals started to study the world around them, mollusks were important subjects for learning how things worked. In this volume, the editors and contributors have brought together a broad range of topics within the field of malacology. It is our expectation that these topics will be of interest and use to amateur and professional malacologists.
