The name “cloud computing” comes from the symbol for a group of networked computers that are connected to the Internet. When network engineers draw diagrams of computer networks, they often symbolize the Internet as a puffy “cloud” shape. This symbol condenses away the unnecessary details about what is in that cloud of linked computers.

Bluetooth is a wireless technology that lets users make wireless and instant connections between various communication devices, such as mobile phones and desktop and notebook computers. Since it uses radio transmission, transfer of voice and data is in real time. This sophisticated mode of transmission also ensures protection from interference and provides for the security of the data transmitted. The Bluetooth radio is built into a small microchip and operates in a globally available frequency band ensuring communication compatibility.
