This book is the first anthology of perspectives on the future of text, one of our most important mediums for thinking and communicating, with a Foreword by the co-inventor of the Internet, Vint Cerf and a Postscript by the founder of the modern Library of Alexandria, Ismail Serageldin. In a time with astounding developments in computer special effects in movies and the emergence of powerful AI, text has developed little beyond spellcheck and blue links. In this work we look at myriads of perspectives to inspire a rich future of text through contributions from academia, the arts, business and technology. We hope you will be as inspired as we are as to the potential power of text truly unleashed.
