Coupled with a headstrong police officer, Warner tries to uncover the truth, healing himself along the way. This was a thick chunk of reading but so rewarding. It did leave many questions unanswered but with more books to come I'm not disheartened. Covenant was the thrilling epic I had been waiting for.

'Get the cameras rolling - Indiana Jones meets Alien. What a combination of mystery, suspense, and unspeakable horror. I loved it!' R.L. Stine Sometimes the truth is stranger than you could ever imagine... All across America, CIA agents are being hunted down and murdered in bizarre circumstances. The deaths cause ripples of panic to spread all through the agency and the finger of blame is pointing at disappeared Defense Intelligence operatives, Ethan Warner and Nicola Lopez, and at Warner's missing fiancée, Joanna Defoe. No longer friendly with the CIA after a botched operation that put them in the line of fire, Warner and Lopez are on their own mission to find Joanna. But when their old boss, Doug Jarvis, hunts them down, they realize that they have one last chance to clear their names - find the person responsible for the murders, or be accused themselves. But the operation is far from simple, and the tentacles of conspiracy spread far wider than Warner and Lopez could ever have imagined. In fact, it's a job that looks set to send them all the way to hell and back. And hell is precisely where Joanna has been... 'Get the cameras rolling - Indiana Jones meets Alien. What a combination of mystery, suspense, and unspeakable horror. I loved it!' R.L. Stine The future has changed its course... In the notorious Bermuda Triangle a private jet vanishes without trace, taking with it scientists working for world-famous philanthropist Joaquin Abell. In Miami, Captain Kyle Sears is called to a murder scene. A woman and her daughter have both been shot through the head. But within moments of arriving, Sears receives a phone call from the woman's husband, physicist Charles Purcell. 'I did not kill my wife and daughter. In less than twenty-four hours I too will be murdered and I know the man who will kill me. My murderer does not yet know that he will commit the act.' With uncanny accuracy, Charles goes on to predict the immediate future just as it unfolds around Sears, and leaves clues for a man he's never met before: Ethan Warner. The hunt is on to find Purcell, and Ethan Warner is summoned by the Defense Intelligence Agency to head up the search. But this is no ordinary case, as Warner and his partner Nicola Lopez are about to discover, and time is literally everything. Ethan Warner and Nicola Lopez are pulled out of hiding in pursuit of their greatest prize yet: the origin of almost every artefact they've uncovered in their investigations with the Defense Intelligence Agency. But now there is a new administration in Washington DC and the Russians are colluding with the White House to seek out the city for themselves. Obsessed with recovering the billions stolen from the corrupt cabal Majestic Twelve, men of power will stop at nothing to obtain untold wealth - even if that means all out war between east and west. Caught in the turmoil, Ethan and Nicola are deployed to find the lost city before the Russians, but they're out on their own as America seeks revenge on their team. Hunted across the globe, the final showdown has begun. From India to the Aegean Sea, the fjords of Norway to the humid jungles of Indonesia, Ethan and Nicola must follow clues left behind 3,000 years ago by a Greek mariner, and everybody is out to stop them at any cost... Ancient cultures on continents separated by thousands of miles simultaneously developed identical technologies thousands of years ago despite never having encountered each other. Their legends contain near-identical descriptions of fiery objects that arrived from the sky, of wise beings that brought them knowledge, and of a great flood that destroyed their cities long, long ago. Modern archaeology dismisses these legends as myths. Ethan Warner knows better. Peru, 1571: On a mountain high in the Andes in the last days of the Inca Empire, six children are ritually sacrificed to the Inca God Inti. Entombed in the icy wastes, they have lain awaiting discovery for centuries. They are remarkable for one reason: their skulls are elongated almost beyond recognition. In 1914, intrepid American explorer Hiram Bingham III discovers the lost Inca citadel of Macchu Picchu, and in doing so starts a race to discover one of the greatest secrets mankind has ever known. Present day: Former US Marine and investigative journalist Ethan Warner has shunned civilization after five investigations with the Defense Intelligence Agency. Living alone in the wilderness, he is tracked down by Dr Lucy Morgan, a scientist who once found the seven thousand year-old remains of an extra-terrestrial species entombed deep in the deserts of Israel. She brings ominous news: there are more remains being found, and there are people willing to kill to obtain them. Hurlled into a global conspiracy that will take them from the deep waters of the East China

Sea to the sweltering jungles of Cambodia, from the deserts of Egypt to the soaring heights of the Andes mountains, Ethan and Lucy must locate and excavate the remains of ancient people whose DNA carries both a message and a cure for a disease born of a species not of this Earth, and in doing so save the life of one young child and change the course of human history

Some monsters only exist in nightmares - others exist for real... While hunting in the Nez Pearce National Forest, Idaho, two men are just about to take a prize-winning shot when their prey unexpectedly bolts. From the forest behind them lunges a huge, horrific creature that crushes one man and tears after the other in a loping mass of rage. Just as he has embarked on a search to find his missing fiancée, Ethan Warner and his partner, Nicola Lopez, are summoned to a meeting with Doug Jarvis of the Defence Intelligence Agency at a research laboratory outside the city. There, they learn that they are being sent north to interview Jesse MacCarthy, a man accused of a double homicide. But all is not as it seems. Jesse swears blind that the other men were killed by a monster. But as Warner and Lopez dig deeper, they uncover a military secret that has been kept under wraps for generations, an experiment that went terribly wrong, and danger lurking in the highest echelons of the US government. A supplemental textbook for middle and high school students, Hoosiers and the American Story provides intimate views of individuals and places in Indiana set within themes from American history. During the frontier days when Americans battled with and exiled native peoples from the East, Indiana was on the leading edge of America's westward expansion. As waves of immigrants swept across the Appalachians and eastern waterways, Indiana became established as both a crossroads and as a vital part of Middle America. Indiana's stories illuminate the history of American agriculture, wars, industrialization, ethnic conflicts, technological improvements, political battles, transportation networks, economic shifts, social welfare initiatives, and more. In so doing, they elucidate large national issues so that students can relate personally to the ideas and events that comprise American history. At the same time, the stories shed light on what it means to be a Hoosier, today and in the past.
