Using a bottom-up
approach, Data
Communications and
Networking presents
this highly technical
subject matter without

relying on complex formulas by using a strong pedagogical approach supported by more than 830 figures. Now in its Fifth Edition, this textbook brings the beginning student right to the forefront of the latest advances in the field, while presenting the fundamentals in a

clear, straightforward manner.

Data Communications and Networking by Behrouz A. Forouzan Data communications refers to the transmission of this digital data between

two or more
computers and a
computer network or
data network is a
telecommunications
network that allows
computers to
exchange data. The
physical connection
between networked
computing devices is
established using
either cable media or
wireless media.

ResearchGate

A computer network is basically a set or group of a computer system and other related hardware devices which are interrelated through different communication channels to implement proper communication procedures and

related networking methodologies whereas data communication is basically a transmission process that includes digital data transfers between two or more computers or similar devices and vice versa.

Computer Network vs
Page 25/38

TCP/IP was designed to allow networks running on different protocols to have an intermediary protocol that would allow them to communicate. So as long as your network supported TCP/IP, you could communicate with all of the other networks

Communication running TCP/IP.

TCP/IP quickly
became the standard
protocol and allowed
networks to
communicate with
each other.
