Scratch to ...

After completing a  
program design, a  
programmer converts  
the design into a series  
of codes or instructions  
that the computer can

run and execute, making use of a specific programming language and required platforms. After converting the design to code, a programmer runs the code and looks for bugs and errors. If a programmer finds code errors, appropriate corrections are applied, and the program is re-run.

# Acces PDF Design It From Programmer To

What is a Programmer?

- Definition from

Techopedia

After the design process is complete, it is the job of the programmer to convert that design into a logical series of instructions that the computer can follow.

The programmer codes these instructions in one of many programming
