Any marine surveyor can tell you he or she has seen plenty of boats that made the switch from gas to diesel engines. Diesels are superior in many ways, ranging from reliability to fuel efficiency. So when Jim Curley, the owner of a New Jersey Pontiac and GMC Truck dealership, picked up a Bertram 31, Curley's main objective was to replace the existing 454-cubic-inch gas blocks with a pair of ...

When you're buying a new boat, or repowering an existing boat, you may need to decide whether gasoline or diesel is right for your needs. If you're not as familiar with diesels as you are with gas engines, and still think of diesels as smoke-belchers, just be aware that there's been a lot going on over the past several years when it comes to diesel engine technology for marine applications.

Boats are used less frequently and in a
sailboat the engine is used even less as the
primary method of propulsion are the sails
and the wind. It is not uncommon to find 30
year old engines in very good shape. The use
of a marine engine is measured in hours and a
diesel engine can easily go 10,000 hours
before requiring a rebuild.

The OXE Diesel is the only outboard engine built particularly with commercial users in mind. It is designed for those who use their boat every day, no matter the conditions, and have to rely on the units for many hours every year. The innovation fills a new segment in the marine industry and cannot be compared to anything on the market today.
