Earth Science Geology, the
Environment, and the Universe
Geology is the primary Earth
science. The word means "study of
the Earth." Geology deals with the
composition of Earth materials,
Earth structures, and Earth
processes. It is also concerned
with the organisms of the planet
and how the planet has changed
over time. Geologists search for

fuels and minerals, study natural hazards, and work to protect Earth's environment.

What is Earth Science? |
Geology.com

Environmental Earth Sciences is an international multidisciplinary journal concerned with innovative approaches and significant aspects of interaction between humans, natural resources or unique geographic zones, with emphasis on the solid earth. In pursuit of these topics, the geoscientific community is invited to contribute their knowledge and experience.

Earth Science Geology, the
Environment, and the Universe ...
Environmental Science provides an
overview of how science affects
our environment. We focus on
interactions between the solid
Earth, its water, its air and its
living organisms, and on dynamic,
interdependent relationships
between these four components.
Earth and environmental scientists
also consider how these
relationships produce
environmental change at different
timescales.

Earth Science Geology, The Environment and Universe ...
Geology is the study of materials that make up the Earth, the processes that form and change these materials, and the history of the planet and its life-forms since its origin. Oceanography is the study of oceans, which cover nearly three-fourths of the planet. Environmental science is the study of the interactions of organisms and their surroundings.
