Essay on my aim in life software engineer

MEGHAN Markle and Prince Harry's new podcast has been blasted as 'woke word salad' by listeners. The Duke and Duchess of Sussex landed a £30million deal with Spotify for their own podcast \b...

Weaving together chapters on imperial Japan's wartime mobilization, Asia's first wave of postwar decolonization, and Cold War geopolitical conflict in the region, *Engineering Asia* seeks to demonstrate how Asia's present prosperity did not arise from a so-called 'economic miracle' but from the violent and dynamic events of the 20th century. The book argues that what continued to operate throughout these tumultuous eras were engineering networks of technology. Constructed at first for colonial development under Japan, these networks transformed into channels of overseas development aid that constituted the Cold War system in Asia. Through highlighting how these networks helped shape Asia's contemporary economic landscape, *Engineering Asia* challenges dominant narratives in Western scholarship of an 'economic miracle' in Japan and South Korea, and the 'Asian Tigers' of Southeast Asia. Students and scholars of East Asian studies, development studies, postcolonialism, Cold War studies and the history of technology and science will find this book immensely useful.

Travel & Tales of an Engineer will hopefully reinforce readers' understanding that engineers can and do make a valuable contribution to society and our environment. These memoirs cover personal stories of Louis Solway in addition to the spread of projects and opportunities he experienced in many countries. Extensive essays are included for projects in Libya, Ghana, Iran, Saudi Arabia, Hungary, Syria and Pakistan - as well as one on the UN International Decade for Natural Disaster Reduction (IDNDR), which is screaming for remedial action in many cities throughout the world before the next major hazard event occurs. Louis Solway was born, married and had all his three children in Birmingham, UK, before a London firm of consulting engineers brought the family to Surrey. He has travelled to many challenging and interesting areas of the world from Hong Kong to Trinidad, spending a lot of time in the Middle East, including four years in Tehran, Iran, with his family, and 17 months in Ghana, West Africa, as a bachelor.
