What are the core elements of a strong proposal? How can I accent the strengths of my study design? What is the best way to get my proposal reviewed and approved? You will find the answers to these and other key issues in this assembly manual for crafting a complete and convincing dissertation proposal.

Sign the contract...then write the book. The good news is that almost every nonfiction book published is sold by a proposal. In this comprehensive yet accessible guide, you will learn exactly what a proposal is, what it must contain, and how to pull yours together into an informative, persuasive selling package. Already a favorite for thousands of aspiring writers, this book has been revised and updated by Elizabeth Lyon to feature nearly two dozen actual proposals, plus: · Choosing a topic based on current trends and competing titles · Drafting the perfect concept statement—daring agents and editors to reject you · Defining and targeting your readership—then connecting with them · Preparing a table of contents and chapter summaries · Submitting exciting and well-written sample chapters · Writing query letters · Devising a marketing plan that will excite agents and publishers

This helpful step-by-step handbook will guide the reader through each stage of doing a research proposal from choosing a subject right through to writing it up.

The public assumes the researcher spends the day dreaming up and trying out creative ideas. In reality, proposal development is an invisible but critical barrier over which even a good researcher may tumble. This book is intended to lower that barrier. It should increase first-trial recognition of good ideas and ensure that rejections do not result because a proposal poorly represented either the ideas, the investigator, or both.

This user-friendly guide helps students get started on--and complete--a successful doctoral dissertation proposal by accessibly explaining the process and breaking it down into manageable steps. Steven R. Terrell demonstrates how to write each chapter of the proposal, including the problem statement, purpose statement, and research questions and hypotheses; literature review; and detailed plan for data collection and analysis. Of special utility, end-of-chapter exercises serve as building blocks for developing a full draft of an original proposal. Numerous case study examples are drawn from across the social, behavioral, and health science disciplines. Appendices present an exemplary proposal written three ways to encompass quantitative, qualitative, and mixed-methods designs. User-Friendly Features \*"Let's Start Writing" exercises leading up to a complete proposal draft. \*"Do You Understand?" checklists of key terms plus an end-of-book glossary. \*End-of-chapter quizzes with answers. \*Case study examples from education, psychology, health sciences, business, and information systems. \*Sample proposal with three variants of the methods chapter: quantitative, qualitative, and mixed methods.

How to Design, Write, and Present a Successful Dissertation Proposal, by Elizabeth A. Wentz, is essential reading for any graduate student entering the dissertation process in the social or behavioral sciences. The book addresses the importance of ethical scientific research, developing your curriculum vitae, effective reading and writing, completing a literature review, conceptualizing your research idea, and translating that idea into a realistic research proposal using research methods. The author also offers insight into oral presentations of the completed proposal, and the final chapter presents ideas for next steps after the proposal has been presented. Taking the view that we "learn by doing," the author provides Quick Tasks, Action Items, and To Do List activities throughout the text that, when combined, develop each piece of your research proposal. Designed primarily for quantitative or mixed methods research dissertations, this book is a valuable start-to-finish resource.

This Second Edition of Diana Ridley’s bestselling guide to the literature review outlines practical strategies for reading and note taking, and guides the reader on how to conduct a systematic search of the available literature, and uses cases and examples throughout to demonstrate best practice in writing and presenting the review. New to this edition are examples drawn from a wide range of disciplines, a new chapter on conducting a systematic review, increased coverage of issues of evaluating quality and conducting reviews using online sources and online literature and enhanced guidance in dealing with copyright and permissions issues.

This book provides information about the key areas needed for a successful project. It includes software skills, developing research objectives, writing proposals, literature reviews, getting ethics approval, seeking funding, managing a project, communicating research findings, and writing reports. There is also a chapter on working as an independent researcher. The book includes numerous examples, checklists, and practical exercises designed to assist the learning of research skills and the completion of crucial project tasks. It covers procedures needed for conducting projects electronically and accessing information from the Internet.

Writing a research proposal is one of the most important tasks facing academics, researchers and postgraduate students. Yet there is a good deal of misinformation and a great lack of guidance about what constitutes a good research proposal and what can be done to maximise one’s chances of writing a successful research proposal. Denicolo and Becker recognise the importance of developing an effective research proposal for gaining either a place on a research degree programme or funding to support research projects and set out to explore the main factors that that proposal writers need to attend to in developing successful proposals of their own. Developing Research Proposals will help readers to understand the context within which their proposal will be read, what the reviewers are looking for and will be influenced by, while also supporting the development of relevant skills through advice and practical activities. This book: Explores the nature and purpose of different kinds of proposals Focuses on the actual research proposed Discusses how best to carry out and structure the literature review Examines the posing and phrasing of research questions and hypotheses Looks at how methods and methodology should be handled in a proposal Discusses the crucial issues of planning, strategy and timing in developing targeted proposals Denicolo and Becker draw together the key elements in the process of preparing and submitting a proposal and concludes with advice on responding to the results, successful or not, and their relevance to future proposals. The Success in Research series, from Cindy Becker and Pam Denicolo, provides short, authoritative and accessible guides on key areas of professional and research development. Avoiding jargon and cutting to the chase of what you really need to know, these practical and supportive books cover a range of areas from presenting research to achieving impact, and from publishing journal articles to developing proposals. They are essential reading for any student or researcher interested in developing their skills and broadening their professional and methodological knowledge in an academic context.
