As the routed North Korean People's Army (NKPA) withdrew into the mountainous reaches of their country and the People's Republic of China (PRC) funneled in its massive infantry formations in preparation for a momentous counter-offensive, both lacked adequate air power to challenge US and UN. Reluctantly, Josef Stalin agreed to provide the requisite air cover, introducing the superior swept-wing MiG-15 to counter the American's straight-wing F-80 jets. This in turn prompted the USAF to deploy its very best – the F-86A Sabre – to counter this threat. Thus began a two-and-a-half-year struggle in the skies known as " MiG Alley. " In this period, the unrelenting campaign for aerial superiority witnessed the introduction of successive models of these two revolutionary jets into combat. This meticulously researched study not only provides technical descriptions of the two types and their improved variants, complete with a " fighter pilot's assessment " of these aircraft, but also chronicles the entire scope of their aerial duel in " MiG Alley " by employing the recollections of the surviving combatants – including Russian, Chinese, and North Korean pilots – who participated.

Eagle pilot Rick " Kluso " Tollini ' s life has embodied childhood dreams and the reality of what the American experience could produce. In his memoir, Call Sign KLUSO, Rick puts the fraught minutes above the Iraqi desert that made him an ace into the context of a full life, exploring how he came to be flying a F-15C in Desert Storm, and how that day became a pivotal moment in his life. Rick ' s first experience of flying was in a Piper PA-18 over 1960s " California as a small boy, and his love of flying through his teenage years was fostered by his pilot father, eventually blossoming into a decision to join the Air Force as a pilot in his late twenties. Having trained to fly jets he was assigned to fly the F-15 Eagle with the " Dirty Dozen, " the 12th Tactical Fighter Squadron, at Kadena AB, Japan before returning Stateside to the 58th Tactical Fighter Squadron " The Gorillas. " Throughout training, Reagan ' s fighter pilots expected to face the Soviet Union, but Rick ' s first combat deployment was Desert Storm. He recounts the planning, the preparation, and the missions, the life of a fighter pilot in a combat zone and the reality of combat. Rick ' s aerial victory was one of 16 accumulated by the Gorillas, the most by any squadron during Desert Storm. Returning from the combat skies of Iraq, Rick continued a successful fulfilling Air Force career until, struggling to make sense of his life, he turned to Buddhism. His practice led him to leave the Air Force, to find a new vocation, and to finally come to terms with shooting down that MiG-25 Foxbat in the desert all those years before. Most importantly, he came to a deeper understanding of the importance of our shared humanity.

Post-Yom Kippur War, Israel purchased the F-15 Eagle, the then world's best air-to-air fighter, in an effort to prevent another surprise attack from the air. For the first time in its history the IDF/AF operated a fighter that was a full generation ahead of opposing interceptors in the region. The first 'kill' F-15 Baz (Bizzard) arrived in Israel in 1976 and soon proved its worth in combat. Israeli Baz pilots were credited with 12.5 kills between 1979 and 1981, with 33 victories following during the June 1982 Lebanon War. Despite substantial combat, no Israeli F-15 has ever been lost to enemy action. In the 1990s the US government supplied the IDF/AF with the F-15I Ra'am (Thunder) to fulfill the long-range surface-to-surface missile mission post-Desert Storm. From A to I, the extremely capable, and combat-tested, Israeli F-15 force will continue to deter potential enemies well into the foreseeable future. This book examines the history and development of these units.

The Soviet Union began assisting the People's Republic of China in its establishment of a modern air force in 1950, when Soviet Air Force regiments were sent to train local pilots. China's involvement in the Korean War in late October 1950 inevitably drew Soviet pilots into the war, with a total of 52 Soviet pilots scoring five or more victories there. The history of these covert actions has been a long-buried secret and this book is the first English publication to detail the only instance when the Cold War became 'hot'. This book uncovers Soviet combat experiences during the Korean War from detailed unit histories and rare first-hand account. With access to extensive Russian archives, the authors offer an enthralling insight into an air war that has largely covered up and neglected. Illustrated with previously unpublished photographs and detailed full colour profiles, this book is a unique opportunity to read about an often-forgotten aspect of the Cold War.

With its twin tail, the F-15 Eagle is probably the most recognizable military jet fighter in the skies today, and is undoubtedly the most successful jet fighter of all time, having never been shot down in combat. Flown not only by the US Air Force but by the air forces of Israel, Saudi Arabi and even Japan, and, with almost 30 years service, the F-15 is the world's leading operational air superiority and interceptor. Steve Davies and Doug Dildy draw on a vast array of sources including combat records, technical documents, and unpublished first-hand accounts from the pilots themselves to tell the story of this amazing plane, detailing such incredible feats as the Israeli F-15 which was successfully landed despite losing a wing. Containing over 100 breathtaking color photographs and comprising detailed technical information, this definitive history and guide to the world's most successful jet fighter is a "must have" for anyone interested in modern aviation.

Following the end of the Korean War, the prevailing myth in the West was that of the absolute supremacy of US Air Force pilots and aircraft over their Soviet-supplied opponents. The claims of the 10:1 victory-loss ratio achieved by the US Air Force fighter pilots flying the North American F-86 Sabre against their communist adversaries, among other such fabrications, went unchallenged until the end of the Cold War, when Soviet records of the conflict were finally opened. Packed with first-hand accounts and covering the full range of US Air Force activities over Korea, MiG Alley brings the war vividly to life and the record is finally set straight on a number of popular fabrications. Thomas McKelvey Cleaver expertly threads together US and Russian sources to reveal the complete story of this bitter struggle in the Eastern skies.

The F-15A/C is irrefutably the most successful jet fighter of the last 30 years. Serving in the Air Forces of Israel, the United States and Saudi Arabia, it has racked up a kill ratio exceeding 105:0. Despite its age, it remains the leading operational air superiority and intercept platform in service today. The hi-tech wizardry of modern air combat detailed in this book makes for fascinating reading, even to those not immediately familiar with modern airpower, and a huge pool of previously unpublished information on both aircrafts' combat records is uncovered.
