This is a fun activity for the student to practice factoring trinomials where a = 1. The student is given 3 different question paths and 24 rectangles to cut out. The top of the rectangle has the answer to the factoring question and the bottom of the rectangle contains the next trinomial to factor.

Factoring Trinomials A=1 Activity & Worksheets | TpT  
Students practice factoring quadratic trinomials by finding the missing side lengths of rectangles that have a trinomial "area". Through factoring, students will determine the side lengths of various-sized rectangles. All trinomials a values are 1. This activity is a nice link back to geometry and

Get Better Results with high quality content, exercise sets, and step-by-step pedagogy! Tyler Wallace continues to offer an enlightened approach grounded in the fundamentals of classroom experience in Beginning and Intermediate Algebra. The text reflects the compassion and insight of its experienced author with features developed to address the specific needs of developmental level students. Throughout the text, the author communicates to students the very points their instructors are likely to make during lecture, and this helps to reinforce the concepts and provide instruction that leads students to mastery and success. The exercises, along with the number of practice problems and group activities available, permit instructors to choose from a wealth of problems, allowing ample opportunity for students to practice what they learn in lecture to hone their skills. In this way, the book perfectly complements any learning platform, whether traditional lecture or distance-learning; its instruction is so reflective of what comes from lecture, that students will feel as comfortable outside of class as they do inside class with their instructor.
