Take an ordinary piece of equipment and turn it into a personal work of art. Build upon an existing idea to create something better. Have fun while voiding your warranty! Some of the hardware hacks in this book include: * Don't toss your iPod away when the battery dies! Don't pay Apple the \$99 to replace it! Install a new iPod battery yourself without Apple's "help" * An Apple a day! Modify a standard Apple USB Mouse into a glowing UFO Mouse or build a FireWire terabyte hard drive and custom case * Have you played Atari today?

Starting in 1981 via Minor Threat's revolutionary call to arms, the clean and positive straight edge hardcore punk movement took hold and prospered during the 1980s, earning a position as one of the most durable yet chronically misunderstood music subcultures. Straight edge created its own sound and visual style, went on to embrace vegetarianism, and later saw the rise of a militant fringe. As the "don't drink, don't

smoke" message spread from Washington, D.C., to Boston, California, New York City, and, eventually, the world, adherents struggled to define the fundamental ideals and limits of what may be the ultimate youth movement. Tony Rettman traces the story of straight edge from adolescent origins to enduring counterculture via fresh first-hand accounts from the clear and alert members of Minor Threat, SS Decontrol, Youth of Today, DYS, Slapshot, Uniform Choice, 7 Seconds, Stalag 13, Justice League, Chain of Strength, No for an Answer, Insted, Gorilla Biscuits, Judge, Bold, Projec

I was diagnosed with colon cancer when I was 43, in the summer of 2015. That's young for a cancer patient. The symptoms were weird and were not what is commonly associated with colon cancer. After major surgery in early 2016, the plan was to get me back on my feet within 6 months. Sadly, the common treatment method of chemotherapy did not work in my case. Turns out I have some genetic defects that lead to an aggressive form of uber nasty cancer, rendering most conventional treatment options useless. As a result, my hospital decided to turn me

away, knowing they had no idea how to help me going forward. Seemingly left to die with no further treatment options, the power of the universe put me in touch with a crack team of doctors at Mount Sinai Hospital in Miami Beach. These people were not so easy to give up on me just yet. They suggested immunotherapy, the same treatment that miraculously cured Jimmy Carter. And it worked wonders! In only two months I went from a sleep deprived wreck, living with constant pain, unable to walk without a wheelchair or a stick, to cycling 10 miles a day. And all that without major side effects. If that's not a miracle then I don't know what is! BROKEN BOWELS is my personal account of these

horrific yet truly amazing years I have endured. I've had countless chemotherapy and radiation treatments and survived terrible side effects. I've had 6 surgeries, I've had a colostomy for almost two years and an ileostomy for three months. I've lived without solid food for nearly a year, and for many months I've endured every type of catheter known to man, until I very nearly lost my whole bladder.
