Generosity is defined as giving freely without expecting anything in return. The best of human beings Muhammad was an exemplar of this. Unlike those who give charity with a reward in mind, whether it be respect, love, admiration or loyalty, RasulAllah (prophet of Allah) expected none of []

Speaking in relation to the terrorist attacks which took place in France on 7th January 2015, Shaykh ʿUbayd al-Jābirī said, “I advise the [imāms] who give sermons, the teachers, the lecturers and Muslim journalists to unite upon a single word and it is: To openly announce [their] disavowal and innocence from this action and other actions of anarchy... The people of the Sunnah hold it as their religion before Allah that in the lands of Europe, America and other non-Muslim lands besides them in which they have settled there is a covenant, a contract [binding upon them]. Hence, they must not violate it [through treachery], ever.” And Shaykh Rabīʿ bin Hādī speaking in defence of the Prophet Muhammad (peace be upon him) with respect to the slanderous and abusive Danish cartoons, said, “Muhammad (peace be upon him) and his rightly-guided Caliphs and his noble Companions did not erect factories for the manufacture of elementary weapons such as swords and spears, let alone atomic bombs and missiles and other such wholly destructive weapons. Muhammad (peace be upon him) did not erect a single factory because he was sent as a mercy to the worlds, to guide all of mankind to that which brings them happiness in the world and afterlife.”This book explores the attempts of immoral and spiteful souls to malign the Prophet Muhammad (peace be upn him) through caricatures and cartoons. Likewise the ideology of the Kharjiite terrorists, its remoteness from Islām and the complete innocence of the Prophet Muhammad (peace be upon him) from such an ideology and its propounders are presented in detail. The issues of jihād and Muslim relations with others in non-Muslim lands are also discussed. This book is for open-minded people who wish to have an accurate understanding of Islām in order to see beyond the incessant propaganda and hate-mongering current in the media.

This volume rejects the notion that Islam’s sacred text is error free and cannot be critically evaluated. The study of the Koran must develop and mature. Scholars of Islam are of course familiar with the book’s many errors and contradictions, but these inherent flaws have rarely been revealed to a wider public. The Origins of the Koran is an attempt to remedy this deficiency by bringing together classic critical essays which raise key issues surrounding Islam’s holy book.Divided into four parts, this important anthology begins with Theodor Nöldeke’s first truly scientific study of the Koran. Part Two focuses on the difficulty of establishing a reliable Koranic text, while Part Three examines the Jewish, Christian, and Zoroastrian sources of Muhammad’s revelation. Part Four is a consideration of the controversial interpretations of contemporary scholar John Wansbrough, who questions the historical reliability of the earliest Islamic sources. This superb collection, which includes additional selections from Leone Caetani, Arthur Jeffery, David Margoliouth, Andrew Rippin, C.C. Torrey, and more, will prove indispensable to scholars and all those interested in the textual underpinning of one of the fastest growing religions in the world.Ibn Warraq is the highly acclaimed author of Why I Am Not a Muslim and Defending the West. He is also the editor of The Origins of the Koran, What the Koran Really Says, Leaving Islam, The Quest for the Historical Muhammad, and Which Koran’.

There are many shouts and screams coming from a range of ideological backgrounds-competing for your ears, heart and mind in order to convince you of negative views regarding Isl,m and Muslims. It would be unfair to accept these ideologically motivated narratives without question and without giving Muslims a chance explain the reality of what they believe in and practice and what Isl,m means to them. Within this context, the book in your hands is a short primer that provides a brief yet concise introduction to Isl,m. It discusses Isl,m's most important foundations, pillars, obligations and major prohibitions and the wisdoms behind them. It also discusses morals and ethics, perfection of character, racism and Isl,m's position towards extremism and terrorism. Finally, the status of women in Isl,m and some related misconceptions are also discussed.

A narrative history of the origins of the Shia and Sunni conflict describes how a seventh-century struggle between the supporters of the late Muhammad's surviving family members erupted in a massacre at Karbala that would become a central component of Shia Islam.

The extraordinary life of the man who founded Islam, and the world he inhabitedland remade. Lesley Hazleton’s new book, Agnostic: A Spirited Manifesto, is out now from Riverhead Books. Muhammad’s was a life of almost unparalleled historical importance; yet for all the iconic power of his name, the intensely dramatic story of the prophet of Islam is not well known. In The First Muslim, Lesley Hazleton brings him vibrantly to life. Drawing on early eyewitness sources and on history, politics, religion, and psychology, she renders him as a man in full, in all his complexity and vitality. Hazleton’s account follows the arc of Muhammad’s rise from powerlessness to power, from anonymity to renown, from insignificance to lasting significance. How did a child shunted to the margins end up revolutionizing his world? How did a merchant come to challenge the established order with a new vision of social justice? How did the pariah hounded out of Mecca turn exile into a new and victorious beginning? How did the outsider become the ultimate insider? Impeccably researched and thrillingly readable, Hazleton’s narrative creates vivid insight into a man navigating between idealism and pragmatism, faith and politics, nonviolence and violence, rejection and acclaim. The First Muslim illuminates not only an immensely significant figure but his lastingly relevant legacy.

Adil writes of the Holy Prophet and how he prayed for mercy upon his enemies. Despite the fact that they did him such harm and caused him so much hurt, he would not curse them, for all prophets' curses instantly take effect.

A myth-shattering view of the Islamic world's myriad scientific innovations and the role they played in sparking the European Renaissance. Many of the innovations that we think of as hallmarks of Western science had their roots in the Arab world of the middle ages, a period when much of Western Christendom lay in intellectual darkness. Jim al- Khalili, a leading British-Iraqi physicist, resurrects this lost chapter of history, and given current East-West tensions, his book could not be timelier. With transporting detail, al-Khalili places readers in the hothouses of the Arabic Enlightenment, shows how they led to Europe's cultural awakening, and poses the question: Why did the Islamic world enter its own dark age after such a dazzling flowering?

A list of the one hundred most influential people in history features descriptions of the careers, contributions, and accomplishments of the political and religious leaders, inventors, writers, artists, and others who changed the course of history. Simultaneous.
