This book offers a thorough and comprehensive review of the lessons learnt from the award-winning 'English in Action' English language teacher development programme, which ran in government primary and secondary schools across Bangladesh from 2008 to 2017. Over the course of nine years the programme involved 51,000 teachers and 20 million school students, demonstrably raising standards of teachers' classroom practice and students' English language attainment, and won the British Council ELTON Award for Local innovation (2013) and Times Higher Education Award for International Impact (2107). The sixteen chapters explore the programme in detail, looking at both the successes and the challenges encountered throughout its course, including the strategies used to address the challenges. The key innovative factors of the programme include: · a positive choice to build on the existing context, such as the lives and experiences of local teachers and the demands of a nationally determined curriculum; · teacher learning taking place in the teachers' own classrooms; · a focus on learning the 'how' of communicative language teaching through reflective practice and peer support; · the use - within a carefully constructed pedagogy - of affordable, readily-available mobile phone technology; · the use of mediated authentic video · a model of teacher development at very

large scale that provided a successful alternative to the 'cascade' model; · a partnership with government institutions to ensure that improved practices are maintained beyond the life of the Programme.

Beyond the undergraduate and graduate levels, education has traditionally ceased when students enter the workforce as professionals in their respective fields. However, recent trends in education have found that adult students beyond the traditional university age often benefit greatly from returning to further their education. *Adult and Continuing Education: Concepts, Methodologies, Tools, and Applications* investigates some of the most promising trends in furthering education and professional development in a variety of settings and industries. With an extensive array of chapters on topics ranging from non-traditional students to online and distance education for adult learners, this multi-volume reference book will provide students, educators, and industry professionals with the tools necessary to make the most of their return to the classroom.

When Varud completed reading the novel of his favourite author, he had the sudden urge to write a story from his life that had just passed by. His school life was ending and he knew the days which he enjoyed the most will never return again. He will never again wait ecstatically outside his house, eagerly waiting for the pool car to meet his friends. He will no longer carry his cricket bat to school on every Saturday. He will never have to worry and study for long hours before the exam. His commutes will be quiet and lonesome and no more made of laughters and happiness. He will fall in love again and maybe again, but he will miss the innocence of being in love for the first time. He will no longer be in that classroom, in the same clothes just like his friends and listening to his favourite teacher. Thus he decided to save the memories for a lifetime. Memories made of happiness, success, failure, rejections, friendship, agony and innocence.

In developing countries across the world, qualified teachers are a rarity, with thousands of untrained adults taking over the role and millions of children having no access to schooling at all. The supply of high-quality teachers is falling behind: poor status, low salaries and inadequate working conditions characterise perceptions of teachers in numerous countries, deterring many from entering the profession, and there are strong critiques of the one dimensional, didactic approach to pedagogic practice. Despite this, millions of teachers are dedicated to educating a newly enfranchised generation of learners. It provides a unique overview of the crisis surrounding the provision of high-quality teachers in the developing world, and how these teachers are crucial to the alleviation of poverty. The book explores existing policy structures and identifies the global pressures on teaching, which are particularly acute in developing economies.

Advances in medical technology increase both the efficacy and efficiency of medical practice, and mobile technologies enable modern doctors and nurses to treat patients remotely from anywhere in the world. This technology raises issues of quality of care and medical ethics, which must be addressed. *E-Health and Telemedicine: Concepts, Methodologies, Tools, and Applications* explores recent advances in mobile medicine and how this technology impacts modern medical care. Three volumes of comprehensive coverage on crucial topics in wireless technologies for enhanced medical care make this multi-volume publication a critical reference source for doctors, nurse practitioners, hospital administrators, and researchers and academics in all areas of the medical field. This seminal publication features comprehensive chapters on all aspects of e-health and telemedicine, including implementation strategies; use cases in cardiology, infectious diseases, and cytology, among others; care of individuals with autism spectrum disorders; and medical image analysis.

Internationally, there is a growing body of research about learners ' responses to, and uses of, emerging technologies. However, the adoption of these technologies in teachers ' professional development is still largely under-researched. Much of the existing literature still positions teachers as playing ' catch-up ' in terms of using technology for teaching and learning in an ever expanding and changing world, and ignores the roles that these emerging technologies can play in teacher, and teacher educator, development and learning. This book aims to address the lack of research in the area, and it contributes to the new knowledge area of how emerging technologies can effectively address professional learning, drawing on case studies and perspectives from across the world. Contributors use a wide variety of approaches to analyse the potential for emerging (and established) technologies, including digital, Web2.0, social media, and IT tools, to develop ' effective ' or ' deep ' professional learning for pre- and in-service teachers and teacher educators. This book was originally published as a special issue of *Professional Development in Education*.

If Adrian Mole had grown up to be a grumpy old git who had to cope with failed marriage and a life-sucking job, and worse, whose colleagues actually thought he was a miserable old git, he might be a bit like Dave Cross. Diary of a Grumpy Old Git is the laugh-out-loud diary of Dave Cross, a man who thought he was reasonably cheerful until someone from his office bought him a 'Grumpy Old Man' diary for Christmas. Determined to prove them wrong, he resolves to be positive for an entire year. But it's not easy when your wife has run off with an estate agent called Brad and you've got a young, ambitious new boss who is determined to make you actually do some work. Add to this the everyday horrors of public transport, shopping, technology, popular culture and dating, and a sunny outlook is too much to ask. But with his fiftieth birthday fast approaching, Dave is determined to make his life less shambolic. Fantastically witty and painfully accurate, Diary of a Grumpy Old Git will appeal to anyone, grumpy old git or otherwise...
