Sylvia is shocked and confused when she is asked to be one of the first black students to attend Central High School, which is scheduled to be integrated in the fall of 1957, whether people like it or not. Before Sylvia makes her final decision, smoldering racial tension in the town ignites into flame. When the smoke clears, she sees clearly that nothing is going to stop the change from coming. It is up to her generation to make it happen, in as many different ways as there are colors in the world.

A frog in the bog grows larger and larger as he eats more and more bugs, until he attracts the attention of an alligator who puts an end to his eating.

From the beloved TV chef and best-selling author—her favorite recipes for flavorful, no-fuss Italian food that use just one pot or pan (or two!). The companion cookbook to the upcoming public-television series Lidia ' s Kitchen: Home Cooking. Lidia Bastianich—"doyenne of Italian cooking" (Chicago Times)—makes Italian cooking easy for everyone with this new, beautifully designed, easy-to-use cookbook. Here are more than 100 homey, simple-to-prepare recipes that require fewer steps and fewer ingredients (not to mention fewer dirty pots and pans!), without sacrificing any of their flavor. These are just a few of the delectable dishes that fill this essential book of recipes: • Spinach, Bread, and Ricotta Frittata • One-Pan Chicken and Eggplant Parmigiana • Roasted Squash and Carrot Salad with Chickpeas and Almonds • Penne with Cauliflower and Green Olive Pesto • Balsamic Chicken Stir-Fry • Skillet Lasagna • Braised Calamari with Olives and Peppers • Beer-Braised Beef Short Ribs • Apple Cranberry Crumble Some of them are old favorites, others are Lidia's new creations, but every one represents Italian food at its most essential—guaranteed to transport home cooks to Italy with a minimum of fuss and muss. "Tutti a tavola a mangiare!"

Houghton Mifflin Harcourt Modern Chemistry © 2017 is a comprehensive high school chemistry textbook and digital program that presents a balanced and engaging approach to conceptual and problem-solving instruction. Designed to accommodate a wide range of student abilities within a general high school chemistry curriculum, the program offers a wealth of consistent support for reading and vocabulary, scientific inquiry, problem solving, and preparation for high-stakes testing. -- <http://www.hmhco.com>

The Seventh Edition of Zumdahl and DeCoste's best-selling INTRODUCTORY CHEMISTRY: A FOUNDATION that combines enhanced problem-solving structure with substantial pedagogy to enable students to become strong independent problem solvers in the introductory course and beyond. Capturing student interest through early coverage of chemical reactions, accessible explanations and visualizations, and an emphasis on everyday applications, the authors explain chemical concepts by starting with the basics, using symbols or diagrams, and conclude by encouraging students to test their own understanding of the solution. This step-by-step approach has already helped hundreds of thousands of students master chemical concepts and develop problem-solving skills. The book is known for its focus on conceptual learning and for the way it motivates students by connecting chemical principles to real-life experiences in chapter-opening discussions and Chemistry in Focus boxes. The Seventh Edition now adds a questioning pedagogy to in-text examples to help students learn what questions they should be asking themselves while solving problems, offers a revamped art program to better serve visual learners, and includes a significant number of revised end-of-chapter questions. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

Follows the journey of three young men--John Landy, Wes Santee, and Roger Bannister--who suffered defeat at the Helsinki Olympics in 1952 but nevertheless vowed to break the four-minute mile, training tirelessly to accomplish their goal.

New York Times Bestseller A Summer Reading Pick for President Barack Obama, Bill Gates, and Mark Zuckerberg From a renowned historian comes a groundbreaking narrative of humanity ' s creation and evolution—a #1 international bestseller—that explores the ways in which biology and history have defined us and enhanced our understanding of what it means to be “ human. ” One hundred thousand years ago, at least six different species of humans inhabited Earth. Yet today there is only one—homo sapiens. What happened to the others? And what may happen to us? Most books about the history of humanity pursue either a historical or a biological approach, but Dr. Yuval Noah Harari breaks the mold with this highly original book that begins about 70,000 years ago with the appearance of modern cognition. From examining the role evolving humans have played in the global ecosystem to charting the rise of empires, Sapiens integrates history and science to reconsider accepted narratives, connect past developments with contemporary concerns, and examine specific events within the context of larger ideas. Dr. Harari also compels us to look ahead, because over the last few decades humans have begun to bend laws of natural selection that have governed life for the past four billion years. We are acquiring the ability to design not only the world around us, but also ourselves. Where is this leading us, and what do we want to become? Featuring 27 photographs, 6 maps, and 25 illustrations/diagrams, this provocative and insightful work is sure to spark debate and is essential reading for aficionados of Jared Diamond, James Gleick, Matt Ridley, Robert Wright, and Sharon Moalem.

This is a print on demand edition of a hard to find publication. Explores whether sufficient data exists to examine the temporal and spatial relationships that existed in terrorist group planning, and if so, could patterns of preparatory conduct be identified? About one-half of the terrorists resided, planned, and prepared for terrorism relatively close to their eventual target. The terrorist groups existed for 1,205 days from the first planning meeting to the date of the actual/planned terrorist incident. The planning process for specific acts began 2-3 months prior to the terrorist incident. This study examined selected terrorist groups/incidents in the U.S. from 1980-2002. It provides for the potential to identify patterns of conduct that might lead to intervention prior to the commission of the actual terrorist incidents. Illustrations.

After being rescued moments before Earth is destroyed, Sam and his daughter Emma are shipped away to planet Syri, where they now reside in a dome with thousands of other human survivors. Complete with welcome mats, mailboxes, and breakfast cereal, the dome is a suburban paradise made to emulate Earth in every way... But something feels wrong. Why did the aliens save them? How did they know about Earth's fate? And exactly what are they hiding?The mystery intensifies as Emma forms an unexplainable bond with one of the Syrions; a bond that quickly has Emma sliding deeper into a dangerous attraction. As Sam and Emma search for answers on their own, Emma wonders if she can trust her heart while Sam questions how he'll be able to protect his family from the very aliens humanity depends on for survival. the DOME is part 1 of a 3 part series. This book has a cliffhanger ending.

"Physical Geology is a comprehensive introductory text on the physical aspects of geology, including rocks and minerals, plate tectonics, earthquakes, volcanoes, glaciation, groundwater, streams, coasts, mass wasting, climate change, planetary geology and much more. It has a strong emphasis on examples from western Canada, especially British Columbia, and also includes a chapter devoted to the geological history of western Canada. The book is a collaboration of faculty from Earth Science departments at Universities and Colleges across British Columbia and elsewhere"--BCcampus website.
