In recent years, many companies have realised customer experience (CX) is the new marketing battle ground. Substantial investments have been made to map customer journeys, identify pain points and improve CX to try and create cut-through. Using real world applications to introduce next generation design tools based on proven concepts from strategy,

Marketing, psychology and creative problem solving, Lean CX: How to Differentiate at Low Cost and Least Risk discusses how to use Lean Management approaches to innovate your customer experience. This practical book describes how the tools from Lean Management can be applied to the CX innovation problem. The authors draw on hundreds of CX design and strategic innovation projects across a range of industries, both B2B and B2C, from primary research through client work and secondary case studies available in the public domain. The examples include many different vertical

Manual African Americans left the South in the Great Migration for what they hoped would be a better life in the North. Members of an extended family in the Georgia-South Carolina lowlands talk about schooling, kinship, work, religion, race, and their love of the place where their family has lived for generations. The "conversational ethnography" argues that a link between race and place in the area helps explain African American loyalty to it; for those who stayed put, a numerical majority, deep cultural roots, and longstanding webs of social connection have outweighed
