An Initial Environmental Examination is the first review of the reasonably foreseeable effects of a proposed action on the environment. Its function is to provide a brief statement of the factual basis for a Threshold Decision as to whether an Environmental Assessment or an Environmental Impact Statement will be required. (3) Threshold Decision.

The Model Rules of Professional Conduct provides an up-to-date resource for information on legal ethics. Federal, state and local courts in all jurisdictions look to the Rules for guidance in solving lawyer malpractice cases, disciplinary actions, disqualification issues, sanctions questions and much more. In this volume, black-letter Rules of Professional Conduct are followed by numbered Comments that explain each Rule's purpose and provide suggestions for its practical application. The Rules will help you identify proper conduct in a variety of given situations, review those instances where discretionary action is possible, and define the nature of the relationship between you and your clients, colleagues and the courts.

Oil production has peaked. The climate is askew. We are in a race to make the inevitable transition to renewable energies and energy conservation. But numerous obstacles stand in the way of important and necessary energy developments. Opposition to hydropower projects is now spilling over onto wind and solar projects. By redeeming hydropower and telling the truth about the potential and limitations of other renewables, the authors dispel myths and identify obstacles to the implementation of a truly sustainable energy strategy.

Mountains are the home of significant ecological resources - wildlife habitat, higher elevation plant systems, steep slopes, delicate soils and water systems. These resources are subject to very visible and growing pressures, most of which are caused by the unique features of mountains. Using as case studies four mountain resorts in the US and Canada, this book analyzes the extent to which the law protects the ecological systems of mountains from the adverse impacts associated with the development, operation and expansion of resorts. In order to examine these issues, Mountain Resorts takes an interdisciplinary approach, with contributions from ecologists and lawyers who focus on ski-related activities, increasing four-season use of the mountains and expanding residential, commercial and recreational development at the mountains' base. Its analysis of an array of US and Canadian federal, state and local laws provides a multifaceted exploration of the intersection of ecology and the law at mountain resorts.

How do Indigenous communities in Canada balance the development needs of a growing population with cultural commitments and responsibilities as stewards of their lands and waters? Caring for Eeyou Istchee recounts the extraordinary experience of the James Bay Cree community of Wemindji, Quebec, who partnered with a multi-disciplinary research team to protect a territory of great cultural significance in ways that respect community values and circumstances. By addressing fundamental questions such as what should be protected and how, Indigenous and non-Indigenous partners reveal how protected area creation presents a powerful vehicle for Indigenous stewardship, biological conservation, and cultural heritage protection.
