Clinics in Developmental Medicine No. 179 The complex nature of the postural control system makes it vulnerable to adverse conditions during early life, such as prenatally or perinatally acquired lesions of the brain or preterm birth. Children with disorders of the developing brain nearly always have dysfunctions in postural control. The postural control system of children with other neurodevelopmental disabilities such as myelomeningocele or muscle disease is also challenged: it has to find age-specific solutions for the postural problems posed by the disorder. These postural problems have serious consequences for the activities of daily life, as adequate postural control is a prerequisite for adequate motility. Until now, knowledge about the nature of postural problems in children has been scattered, and this has hampered the development of appropriate therapeutic management strategies. This book is a breakthrough in that it introduces the reader to the complexity of typical and atypical postural development and provides suggestions for the day-to-day management of postural problems in children with developmental disorders such as cerebral palsy, developmental coordination disorder, muscle disorder and myelomeningocele. " This should be a " must read " for anyone whose occupation or interests are in the areas of motor development or rehabilitation " Diane Damiano

Opto-mechanical Fiber Optic Sensors: Research, Technology, and Applications in Mechanical Sensing offers comprehensive coverage of the theoretical aspects of fiber optic sensors (FOS), along with current and emerging applications in the mechanical, petroleum, biomedical, biomechanical, aerospace and automotive industries. Special attention is given to FOS applications in harsh environments. Due to recent technology advances, optical fibers have found uses in many industrial applications. Various sectors are major targets for FOS's capable of measuring mechanical parameters, such as pressure, stress, strain and temperature. Opto-mechanical FOS's offer unique advantages, including immunity to electromagnetic interference, high fidelity and signal-to-noise ratio, low-loss remote sensing and small size. Provides current background information and fundamentals on fiber optic sensors technology Covers a wide variety of established and emerging applications of FOS Focuses on mechanical parameter measurement Includes contributions from leading researchers and practitioners in their fields Covers current methods of fabrication and packaging

Experimental approaches to auditory research make use of validated animal models to determine what can be generalized from one species to another. This volume brings together our current understanding of the auditory systems of fish and amphibians. To address broader comparative issues, this book treats both fish and amphibians together, to overcome the differing theoretical and experimental paradigms that underlie most work on these groups.

You know what happens when bad boys get what they wish for? Everything. . . New York Times Bestselling Author Lori Foster Playing Doctor Attitude makes a huge difference in bed. It could be Axel Dean's motto. The sexy physician likes his women with sensual moxie, and Libby Preston definitely seems to fit that bill. There's that naughty grin. That hot bod. Her eager kisses and cheeky insults. Her . . .admitted virginity. Whoa. Okay, cue cold shower. Axel may not be an honorable man, but he has his limits. Except Libby won't take no for an answer. She's determined to have someone show her what she's been missing, and suddenly, Axel can't bear to think of Libby playing doctor with anyone else. . . USA Today Bestselling Author Erin McCarthy The Lady of the Lake Pro baseball player Dylan Diaz is pretty sure he's going to hell. When you rescue a drowning woman from a lake your first thought should be, "Are you okay?" not, "Can I make mad, passionate love to you?" But the minute sputtering kindergarten teacher Violet Caruthers is on Dylan's boat, that's all he can think about. Maybe it's the potent combo of a nun's personality inside a stripper's body. Maybe it's the way she drives him crazy with desire and laughter. Or maybe, Dylan's finally found what's been missing in his life, and he's not about to let go. . .

If you can build websites with CSS and JavaScript, this book takes you to the next level—creating dynamic, database-driven websites with PHP and MySQL. Learn how to build a database, manage your content, and interact with users. With step-by-step tutorials, this completely revised edition gets you started with expanded coverage of the basics and takes you deeper into the world of server-side programming. The important stuff you need to know: Get up to speed quickly. Learn how to install PHP and MySQL, and get them running on both your computer and a remote server. Gain new techniques. Take advantage of the all-new chapter on integrating PHP with HTML web pages. Manage your content. Use the file system to access user data, including images and other binary files. Make it dynamic. Create pages that change with each new viewing. Build a good database. Use MySQL to store user information and other data. Keep your site working. Master the tools for fixing things that go wrong. Control operations. Create an administrative interface to oversee your site.

Based on the successful Baby Owner's Manual, The Baby Owner's Maintenance Log presents a refreshing alternative to traditional sugar-sweet baby journals. Hip parents can record all major milestones and measurements in these pages, including the arrival of the unit, fuel preferences and speech activation. Spiral binding, hilarious illustrations and a bound-in envelope for keepsakes make this guided journal a great shower gift.

The state of North Carolina has had a longstanding concern and com mitment to the understanding and treatment of autistic, communications handicapped children and their families. This commitment found expres sion in the only comprehensive statewide program for families confronted with this disability, Division for the Treatment and Education of Autistic and related Communication handicapped CHildren (Division TEACCH). Our program staff has been privileged to respond to this commitment by developing and providing the needed services, and to engage in research informed by our clinical experience. Although many of the problems con cerning these developmentally disabled children remain to be solved, substantial progress has been made during this past decade of collab oration among professionals, parents, and their government representa tives. The TEACCH staff has resolved to mark the effectiveness of this collaboration by holding a series of annual conferences focused on the several major issues confronting these children and their families. The conferences are held in order to bring together the best research knowl edge available to us from throughout the country, and to encourage par ticipation by the different professional disciplines and concerned parents. In addition these annual meetings form the basis for a series of books based on the conference theme. These books are, however, not merely the published proceedings of the presented papers: some chapters are expanded from conference presentations and many others were solicited from experts in the related areas of research and their service application.

Everyone has memories of their early family life. This book gives young children access to people's memories alongside photographs to help them build up a picture of the past. From wartime families to holidays and family celebrations, young children can explore what has changed and what remains the same. The book is part of the "Tell me what you remember" series, which explores changes in living memory through photographs and memories. It is a perfect teaching tool for KS1 or for children up to age 7.
