Bank of America said revenue declined from a year earlier because of a 6% drop in net interest income due to lower interest rates.

The story of men who are hurting—and hurting America by their absence Man Out describes the millions of men on the sidelines of life in the United States. Many of them have been pushed out of the mainstream because of an economy and society where the odds are stacked against them; others have chosen to be on the outskirts of twenty-first-century America. These men are disconnected from work, personal relationships, family and children, and civic and community life. They may be angry at government, employers, women, and "the system" in general—and millions of them have done time in prison and have cast aside many social norms. Sadly, too many of these men are unsure what it means to be a man in contemporary society. Wives or partners reject them; children are estranged from them; and family, friends, and neighbors are embarrassed by them. Many have disappeared into a netherworld of drugs, alcohol, poor health, loneliness, misogyny, economic insecurity, online gaming, pornography, other off-the-grid corners of the internet, and a fantasy world of starting their own business or even writing the Great American novel. Most of the men described in this book are poorly educated, with low incomes and often with very few prospects for rewarding employment. They are also disproportionately found among millennials, those over 50, and African American men. Increasingly, however, these lost men are discovered even in tony suburbs and throughout the nation. It is a myth that men on the outer corners of society are only lower-middle-class white men dislocated by technology and globalization. Unlike those who primarily blame an unjust economy, government policies, or a culture sanctioning "laziness," Man Out explores the complex interplay between economics and culture. It rejects the politically charged dichotomy of seeing such men as either victims or culprits. These men are hurting, and in turn they are hurting families and hurting America. It is essential to address their problems. Man Out draws on a wide range of data and existing research as well as interviews with several hundred men, women, and a wide variety of economists and other social scientists, social service providers and physicians, and with employers, through a national online survey and in-depth fieldwork in several communities.

A little boy who overfeeds his goldfish begins an adventure that brings even the police and a fire engine to cope with a fish out of water. Beginning readers will delight in this fast-moving story.

The largest, most comprehensive, and most entertaining reference of its kind, *The Dictionary of Clichés* features more than four thousand unique clichés and common expressions. Author Christine Ammer explores the phrases and terms that enliven our language and uncovers expressions that have long been considered dead. With each entry, she includes a thorough definition, origin of the term, and an insightful example. Some of the clichés brought into the limelight include: • Blood is thicker than water • Monkey see, monkey do • Brass tacks • Burn the midnight oil • Change of heart • Moral fiber • By the book Whether clichés get under your skin or make you happy as a clam, *The Dictionary of Clichés* goes the extra mile to provide an essential resource for students, teachers, writers, and anyone with a keen interest in language. And that's food for thought.

The twenty-first century has witnessed an explosion of speculative fiction in translation (SFT). Rachel Cordasco examines speculative fiction published in English translation since 1960, ranging from Soviet-era fiction to the Arabic-language dystopias that emerged following the Iraq War. Individual chapters on SFT from Korean, Czech, Finnish, and eleven other source languages feature an introduction by an expert in the language's speculative fiction tradition and its present-day output. Cordasco then breaks down each chapter by subgenre--including science fiction, fantasy, and horror--to guide readers toward the kinds of works that most interest them. Her discussion of available SFT stands alongside an analysis of how various subgenres emerged and developed in a given language. She also examines the reasons a given subgenre has been translated into English. An informative and one-of-a-kind guide, *Out of This World* offers readers and scholars alike a tour of speculative fiction's new globalized era.

A synthesis of research and theory, this work chronicles the dawn of a new era in which the adaptability and autonomy of living organisms becomes the model for human made systems and machines. The author combines ideas from the Chaos Theory, cybernetics, current thinking on evolution and research into computerized artificial life with his own experience of on-line culture to show that industrial culture is now obsolete. This book presents the prospects of imminent revolution as Kelly identifies new frontiers of thinking about biological systems that will change the way the natural world is perceived.

Argues that human freedom is threatened by systems of intelligent persuasion developed by tech giants who compete for our time and attention. This title is also available as Open Access.

Practical, proven self help steps show how to transform 40 common self-defeating behaviors, including procrastination, envy, obsession, anger, self-pity, compulsion, neediness, guilt, rebellion, inaction, and more.

For fans of *Radium Girls* and history and WWII buffs, *The Girls Who Stepped Out of Line* takes you inside the lives and experiences of 15 unknown women heroes from the Greatest Generation, the women who served, fought, struggled, and made things happen during WWII--in and out of uniform, for theirs is a legacy destined to embolden generations of women to come. *The Girls Who Stepped Out of Line* are the heroes of the Greatest Generation that you hardly ever hear about. These women who did extraordinary things didn't expect thanks and shied away from medals and recognition. Despite their amazing accomplishments, they've gone mostly unheralded and unrewarded. No longer. These are the women of World War II who served, fought, struggled, and made things happen--in and out of uniform. Liane B. Russell fled Austria with nothing and later became a renowned U.S. scientist whose research on the effects of radiation on embryos made a difference to thousands of lives. Gena Turgel was a prisoner who worked in the hospital at Bergen-Belsen and cared for the young Anne Frank, who was dying of typhus. Gena survived and went on to write a memoir and spent her life educating children about the Holocaust. Ida and Louise Cook were British sisters who repeatedly smuggled out jewelry and furs and served as sponsors for refugees, and they also established temporary housing for immigrant families in London. Retired U.S. Army Major General Mari K. Eder wrote this book because she knew their stories needed to be told--and the sooner the better. For theirs is a legacy destined to embolden generations of women to come.

Acclaimed author Karen Hesse's Newbery Medal-winning novel-in-verse explores the life of fourteen-year-old Billie Jo growing up in the dust bowls of Oklahoma.
