Possibly the most colourful figure in the history of Western music, Hector Berlioz (1803-1869) was certainly the most eloquent. His autobiography is among the greatest ever written. Larger than life like his massive works Berlioz was a seminal figure in the Romantic movement and his book is both a personal testament and an account of his role in that movement. It tells the story of his romance with Harriet Smithson "with whom he fell in love when he saw her playing the part of Ophelia" and his even more passionate affairs with

There is an eloquent plea to stop the constant rise in concert pitch (an issue still discussed today), a serious piece on the place of music in church, and a humorous and imaginative

enchantments of New Zealand to the rings of Saturn where Beethoven's spirit was said to reside. The settings for his musical works are more conservative, and his adventurousness has instead been located in his mastery of the orchestra, as both orchestrator and conductor. Inge van Rij's book takes a new approach to Berlioz's treatment of the orchestra by exploring the relationship between these two forms of control - the orchestra as abstract sound, and the orchestra as collective labour and instrumental technology. Van Rij reveals that the negotiation between worlds characteristic
