of The Minority Report, Commissioner John Anderton is the one to thank for the lack of crime. He is the originator of the PreCrime System, which uses "precogs"--people with the power to see into the future--to identify criminals before they can do any harm. Unfortunately for Anderton, his precogs perceive him as the next criminal.

The card that Fleming gives to Anderton is a significant clue, as it prompts him to think about the minority report. The radio announcement, which provides a theoretical explanation for the story's precognitive dynamics, establishes why Precrime works at all: if the future was predetermined, then the police could not alter it.

In the fall of 1948 H. L. Mencken, then at the top of his unmatched form (he had spoken at a meeting of the American Philosophical Society in Philadelphia only a little while before), suffered a stroke. He soon recovered his physical vigor, but writing was for him a thing of the past. Some months before his death, in going through some papers that he was putting in order for deposit in his beloved Enoch Pratt Free Library in Baltimore, his long-time secretary discovered these Notebooks. Mencken meant to publish them, as he makes clear in the preface, which also describes them better than I can. Suffice it to say that here is one more generous sampling of the old Mencken battling fearlessly for the freedom and dignity of the individual and for the general decencies of life and attacking all that seems fundamentally hostile to man: government, organized religion, professional philosophers, and pedagogues above all. It shows his restless and inquiring mind ranging over many of the problems that beset all of us who ever take time out to think, all in his unmatched style, which, however much it crackles, has the supreme virtue—which Henry always found in his own great model, Thomas Henry Huxley—that of never leaving you in doubt of its meaning. Read the preface and note that this book is precisely what its title suggests; it consists of hundreds of notes—some only a few lines in length, some running to several pages, all reflecting a rigorous and exhilarating mind and personality. It may be a long time before another like him crosses our path.

Are the views of Latinos and African Americans underrepresented in our federal government? For that matter, what does it mean to be represented equitably? Rather than taking for granted a single answer to these complex questions, John Griffin and Brian Newman use different measures of political equality to reveal which groups get what they want from government and what factors lead to their successes. One of the first books to compare the representation of both African Americans and Latinos to that of whites, *Minority Report* shows that congressional decisions and federal policy tend to mirror the preferences of whites as a group and as individuals better than the preferences of either minority group, even after accounting for income disparities. This is far from the whole story, though, and the authors' multifaceted approach illustrates the surprising degree to which group population size, an issue's level of importance, the race or ethnicity of an office holder, and electoral turnout can affect how well government action reflects the views of each person or group. Sure to be controversial, *Minority Report* ultimately goes beyond statistical analyses to address the root question of what equal representation really means.

The plight of religious minorities in the Middle East is often attributed to the failure of secularism to take root in the region. *Religious Difference in a Secular Age* challenges this assessment by examining four cornerstones of secularism—political and civil equality, minority rights, religious freedom, and the legal separation of private and public domains. Drawing on her extensive fieldwork in Egypt with Coptic Orthodox Christians and Bahais—religious minorities in a predominantly Muslim country—Saba Mahmood shows how modern secular governance has exacerbated religious tensions and inequalities rather than reduced them. Tracing the historical career of secular legal concepts in the colonial and postcolonial Middle East, she explores how contradictions at the very heart of political secularism have aggravated and amplified existing forms of Islamic hierarchy, bringing minority relations in Egypt to a new historical impasse. Through a close examination of Egyptian court cases and constitutional debates about minority rights, conflicts around family law, and controversies over freedom of expression, Mahmood invites us to reflect on the entwined histories of secularism in the Middle East and Europe. A provocative work of scholarship, *Religious Difference in a Secular Age* challenges us to rethink the promise and limits of the secular ideal of

religious equality.

Philip K. Dick is shown at his incomparable prime in this fourth volume of the definitive collection of short fiction.

Seminar paper from the year 2003 in the subject Communications - Movies and Television, grade: 1,7 (A-), University of Siegen (Anglistics), course: *Delirious New York - Hollywood Film*, 9 entries in the bibliography, language: English, abstract: At least since political and social considerations of black rights movements have found their way into Hollywood movie studios in the 1960ies, blackness in film has always been a central point of cinematographic discussion. Blaxploitation movies, for example, have been critically observed by both white and black film critics and have gained a wide range of differentiated responses. Interesting enough, whiteness in Hollywood film has mostly been disregarded by critics until the late 1990ies. Indeed "There has recently been a recognition of the need to undertake analysis of whiteness without maintaining and intensifying the privileged position assigned to it" (Young, Lola; *Fear of the Dark - Race, Gender and Sexuality in the Cinema*. New York: Routledge. 1996: 32). The fact that a film has a white director or is mainly starred by white actors seems to be normality in western societies. "White has no categorical status: it is the norm against which everything else is measured with no need of selfdefinition." [Dyer, Richard. "White" Screen: The Last Special Issue on Race?. Volume 29, Number 4, Autumn: 44-65. 1988. Quoted in: Young (1996)]. This quote exemplifies the role that whiteness had for a long time within the western cinematic analysis system. With the changing conception of blackness in film and the change in the political discourse of the terms 'race' and 'ethnicity', it becomes obvious that whiteness indeed has a need of self-definition and analysis. When one really takes these points into consideration, it becomes obvious that whiteness in film can have as much effect on the viewer as blackness in film and that it should be analysed just as well in modern film criticism. In this essay I will try to give two examples o
